HYDRAULICALLY OPERATED AIR FLOW CONTROL VALVE

DESCRIPTION:

Combined flow regulator and shut-off valve with hydraulic control

- Precise flow control by hydraulic pressure
- DN 43 Outlet port size G 1 $\frac{1}{4}$
- Robust anodised aluminium body
- Easy to install directly to different sizes of outlet ports

Application example:

A discharge valve of an air compressor

TECHNICAL DETAILS

Maximum flow

Maximum operating compressed air pressure

Hydraulic control pressure range
