PDR - ROTARY ACTUATORS

Benefits

- Double acting pneumatic rotary actuator with adjustable end cushioning to operate hatches and doors
- Maximum torque at the end positions

TECHNICAL DETAILS

Operating medium	Compressed air, filtered to 40 μm , lubricated or without lubrication
Optional output torque	Maximum torque at closed position to keep the door closed – minimum in the middle
Rotary angle	170°
Pressure range	110 bar
Ambient temperature range	-20-+70°C
Materials	End caps and cylinder barrel - Anodized aluminium Piston rods - AlSI303 chrome plated stainless steel Mounting parts - AlSI316L stainless steel Piston rod nut - Zinc plated steel Plugs - Brass
