

**REACH Regulation 1907/2006/CE****Concerning registration, evaluation, authorization and restriction of chemicals**

As per the regulation above we declare as follows:

Pimatic Oy produces items using raw materials and semi-finished products which may contain substances identified as SVCH (Substances of Very High Concern), included in the list of substances requiring authorization.

Pimatic Oy declares that depending on the raw material used, some products may contain some Lead in the quantity above 0,1% in weight. Being listed on SVHC does not imply any change in the conditions of use of the product. Pimatic products are meant for industrial use and not for direct, prolonged contact with people.

The normal or reasonable foreseeable use of our articles therefore does not require particular precautions. The only recommendation is to avoid cutting or drilling our articles when disposing, as this would cause exposure to the above substance or its dispersion in the environment.

Pimatic Oy will strive to periodically monitor the Candidate List of the SVCH substances, updated by ECHA and to promptly inform all parties involved if new SVCH substances are present in our products. We make sure that our suppliers meet all requirements regarding chemical substances to maintain a consistent supply of reliable and safe products to our customers.
